

Downloading results to the App from the internet (Meet manger od Hy-Tek Amerika, Austrália, Oceánia, Afrika ...)

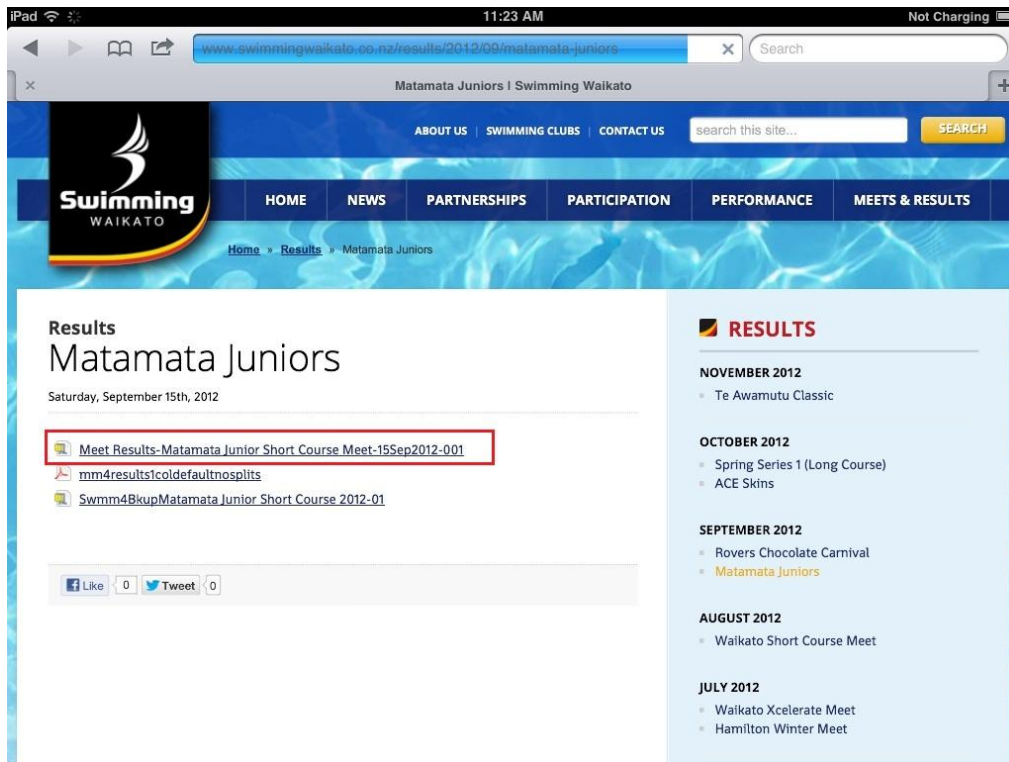

App lets you to import results strait in to the application. Results in the Hi-Tec format that are generated to Meet manager file can be downloaded from internet. team manager result file. This is in zip format .

After downloading this file we need to unzip this file and import in to Manager of meets

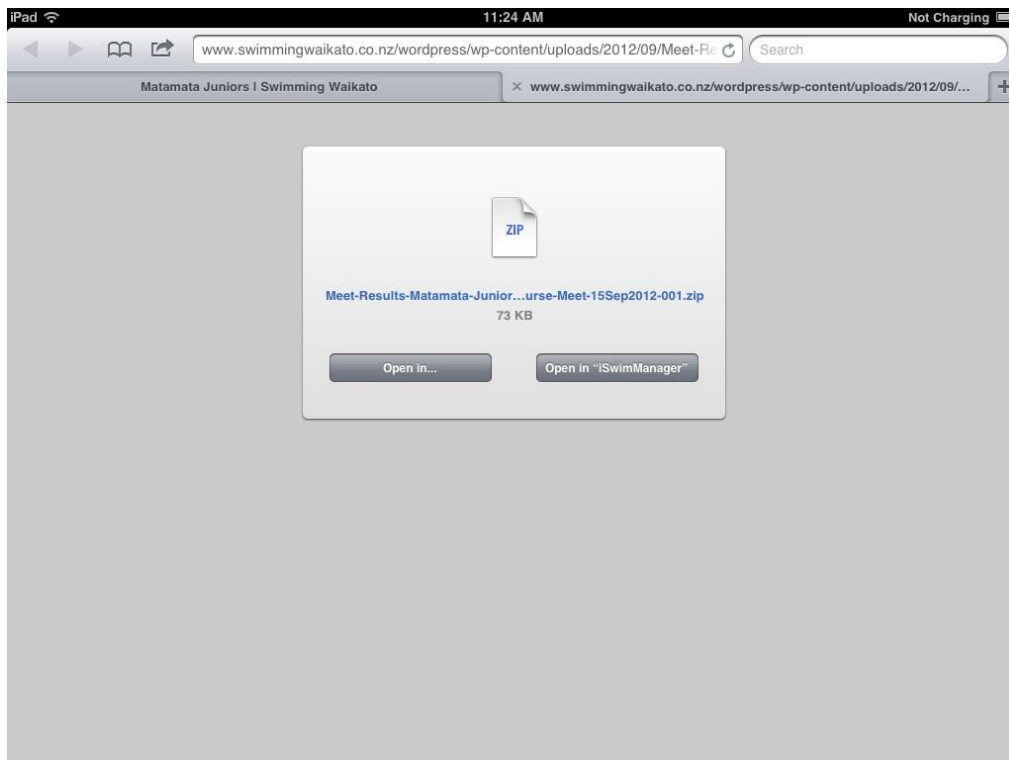

Open app Safari on your iPad find website with results for any meet. example pic 1

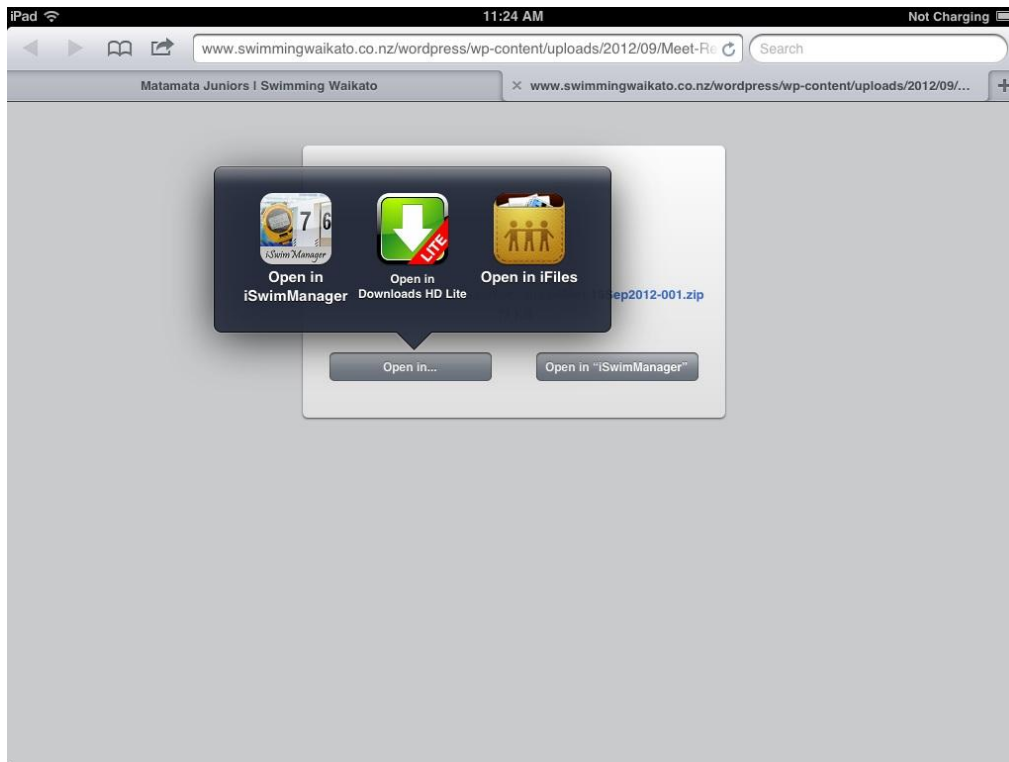

Press on to, the result file pic 2

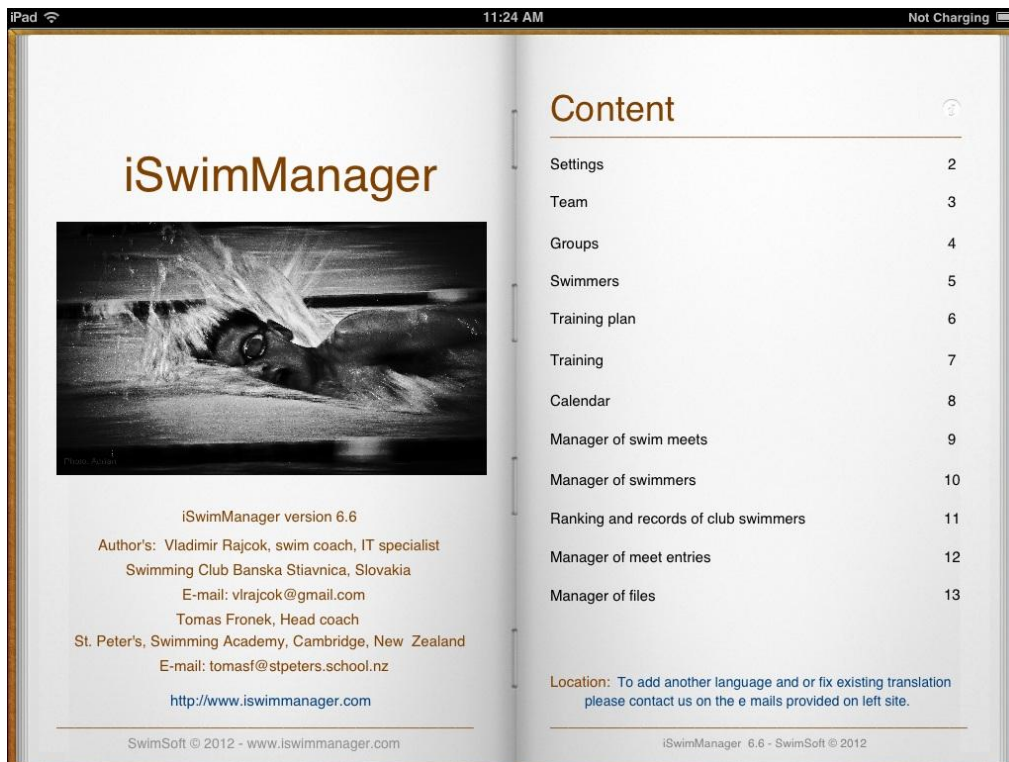

Page will open with open option pic 3

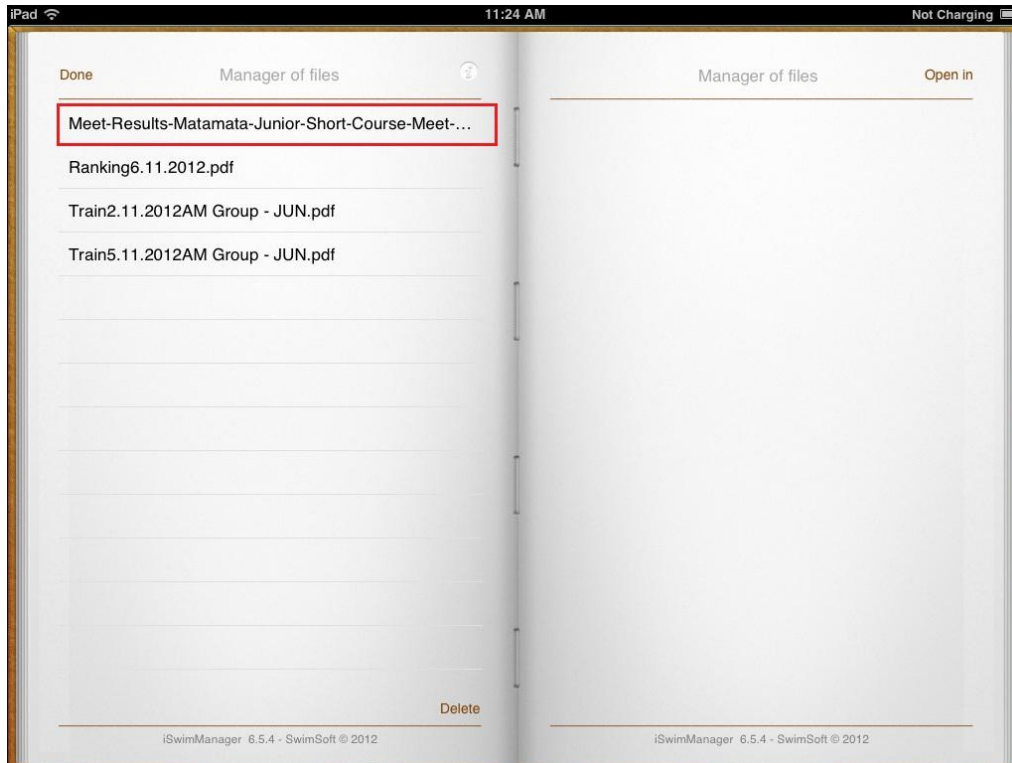

Select Open in ad list of open in options will appear. Pic 4

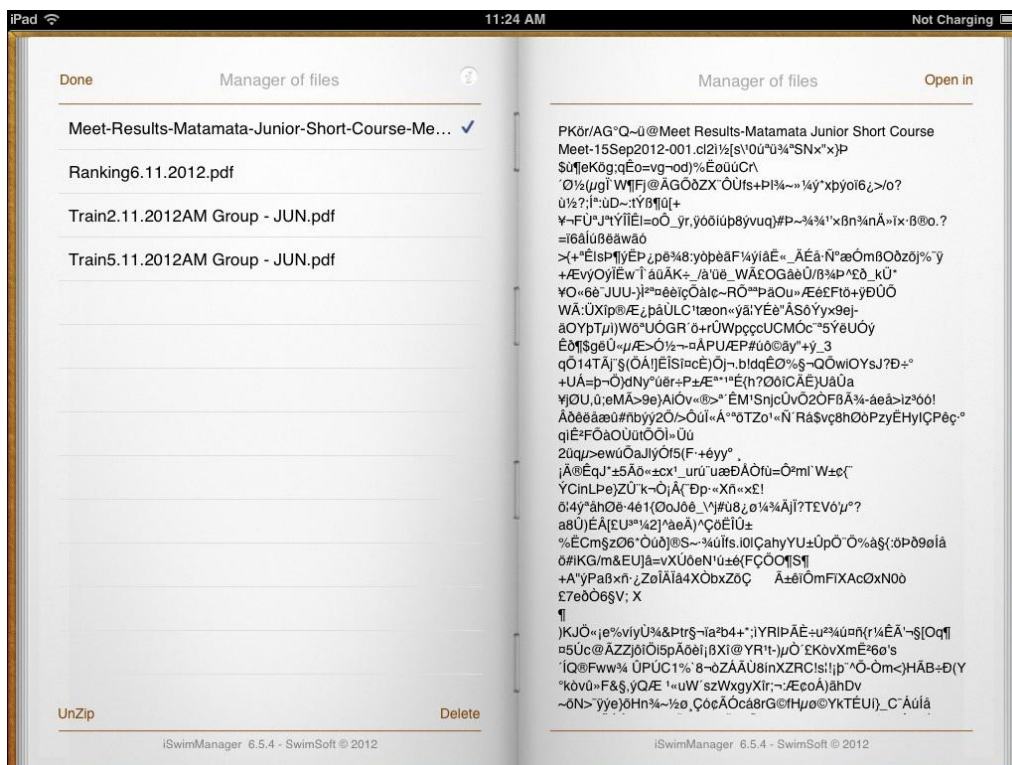

Select iSwimManager and iPad will automatically go to iSwimManager pic 5

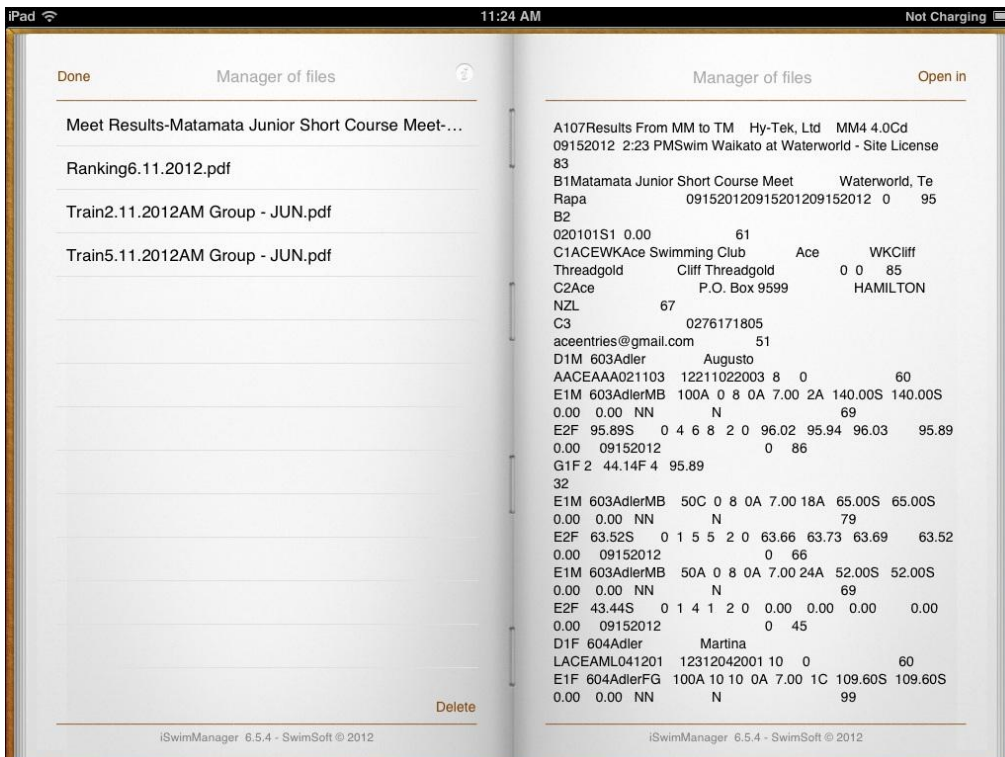

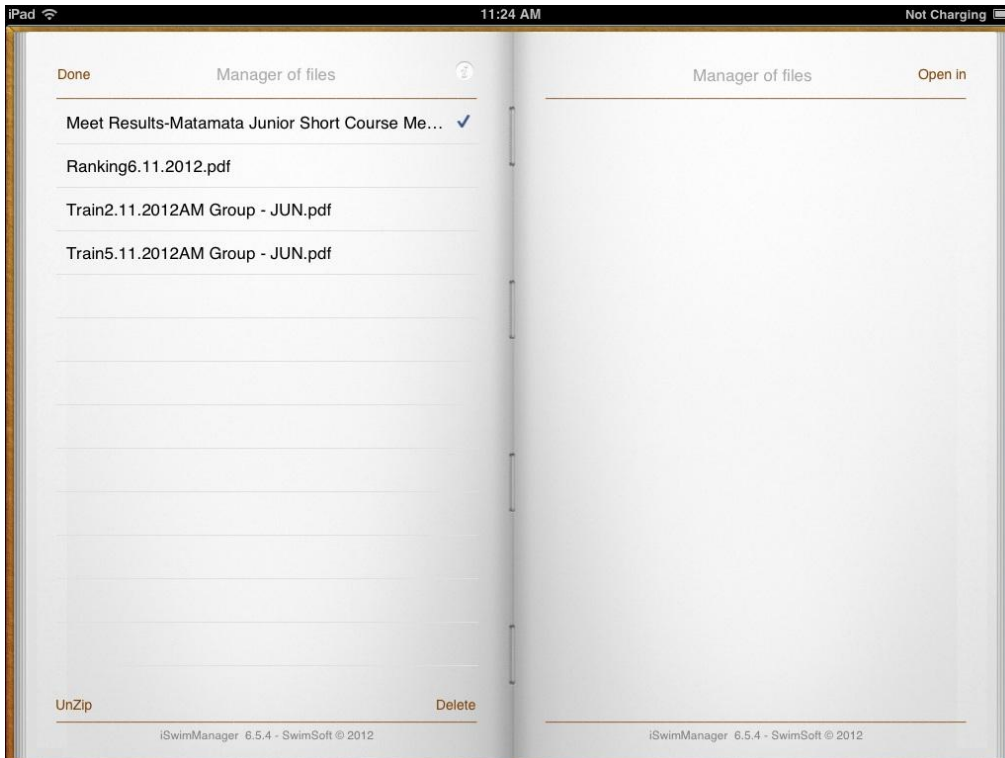

Select Manager of Files pic 6

All files that your application was using will be shown on left site. Select the result file you have downloaded. Pic 7

When selected you will see writing on your right site. This may not make much sense, button Unzip will appear. This way you unzip the file. Now the writing should make sense pic 8/9

Now the results can be imported in your app.Manger of swim meets.

All well when using App iSwimManager

iSwimManger team.
