

Downloading results to the App from the internet („Splash“ Meet manager Canada, Europa, Russia ...)

App lets you Download results strait in to the app. The results can be found on the interned under Format Lenex (Result.lxf).

You need to unzip the file in Manger of swim meets.

Open Safari and go to any website where results can be found pic.1

The screenshot shows a mobile browser interface displaying swimming results from the Fédération Française de Natation website. The page is titled "Meeting de Lillers - Didier C" and shows results for a 50m Freestyle Dames race. The results are as follows:
