Team data entry

Team data entry

The application records the basic details of the team. They are mandatory for data that must be completed to allow the registration of App. These are the [Team Name](#), [Team Address](#), [Zip Code](#), [City](#), [Country](#), [National Team Code](#), [Team Registration Code](#), [National Swimming Federation](#). See [Figure No. 42](#)

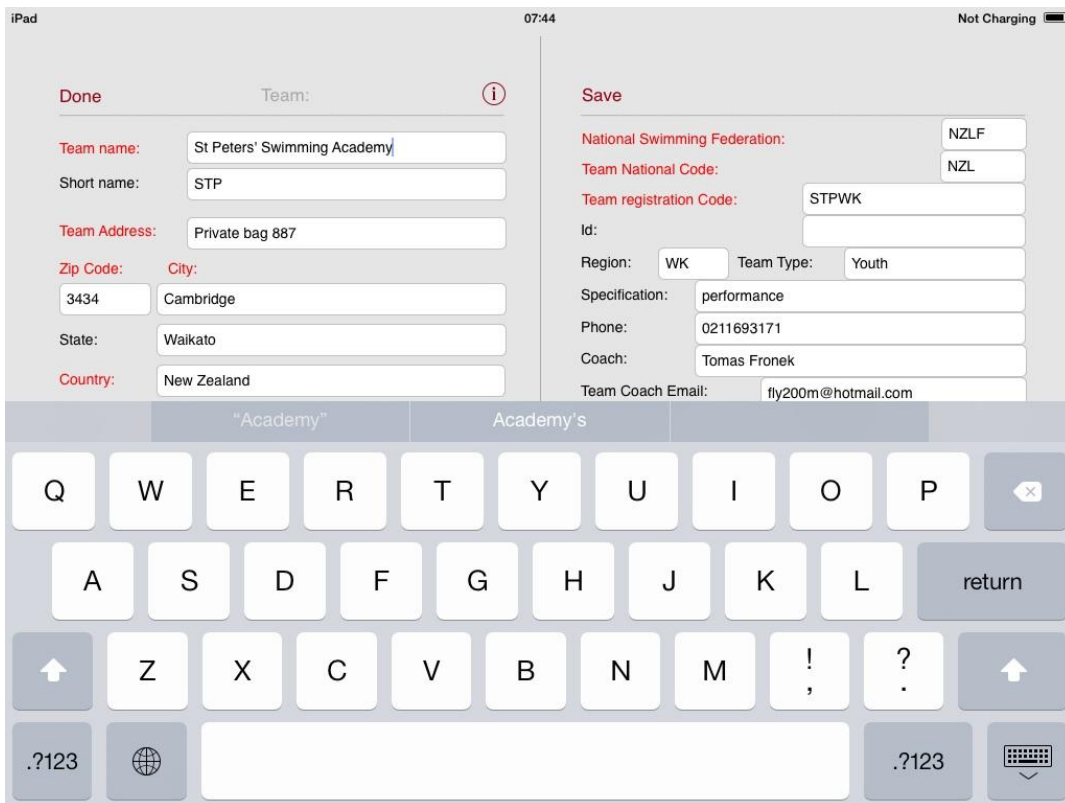

The screenshot displays the iPad interface for team data entry, split into two panels: 'Done' and 'Edit'.

Done Panel: Features a 'Done' button at the top left and a 'Team:' header with an information icon. The form includes input fields for: Team name, Short name, Team Address, Zip Code, City, State, Country, and www.

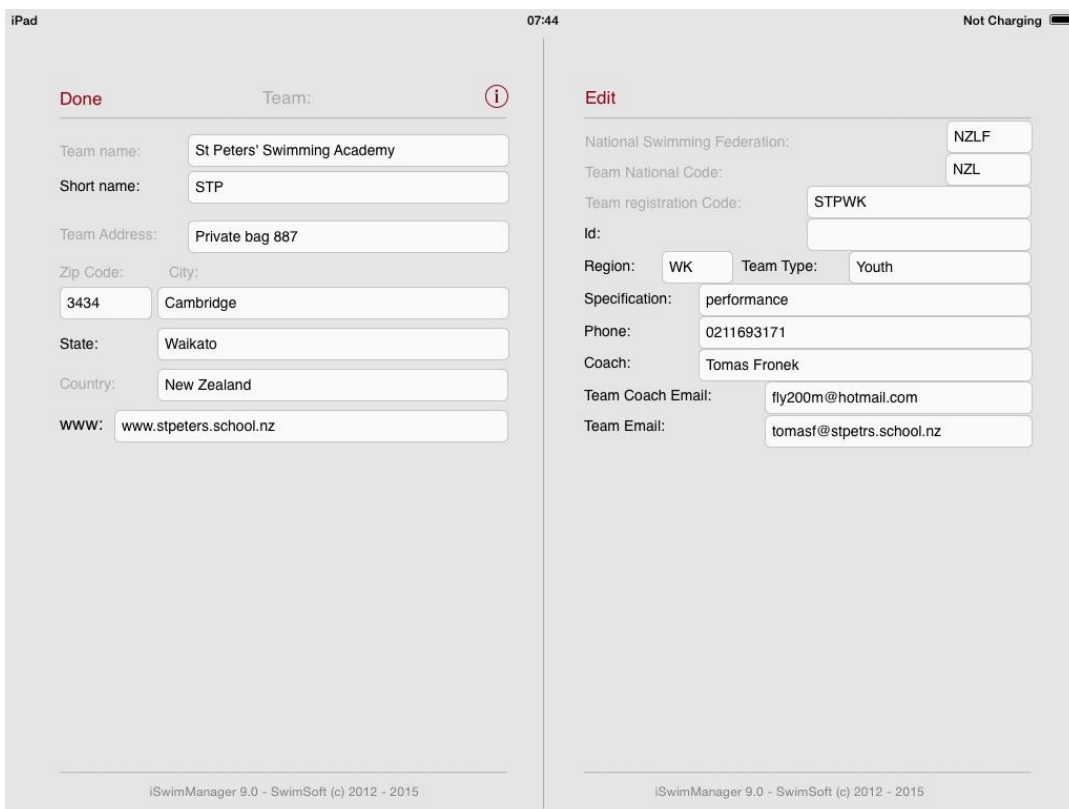

Edit Panel: Features an 'Edit' button at the top left. The form includes input fields for: National Swimming Federation, Team National Code, Team registration Code, Id, Region, Team Type, Specification, Phone, Coach, Team Coach Email, and Team Email.

At the bottom of each panel, the text 'iSwimManager 9.0 - SwimSoft (c) 2012 - 2015' is visible.

Entry of data is performed by pressing the [Edit](#) button. See [Figure No. 43](#)

Lists all defined data and press the **Save** button, the entry of data into the database. See Figure No. 44

The most important figure is the **Team Registration Code**. Write it in English and in capital letters. In it are recorded the results of races in App. If you enter the wrong code its results will not be in the App also any swimmers in the database. The team code need to be adential.

Short name for club - club code.

Region code is code of the region that the club is registered.

Id code used by the French Swimming Federation to mark the club. If Id code completed, must be the same as the registration code picture club see Figure No. 45

The screenshot shows an iPad interface for team registration. The left pane is titled 'Done' and 'Team:' with an information icon. It contains the following fields:
